Launch XDP

Launch
NDP-32BAN

Welcome at the Achema

We would like to welcome you at our stand at the Achema from 18 - 22 June where we are going to launch a number of new pumps for different applications.

No ticket for the Achema? We have some entrance tickets available, contact us! Come and see for yourself! Hall 8 E88

During the Achema Exhibition there is limited support from our sales and customer service department.

Launch Solenoid Valve Controlled Pumps

Yamada has a long-time experience with solenoid controlled pumps and has set the new standard for this specific type of pumps.

Solenoid valves are the most frequent used control elements in fluidics. Their task are to shut off, release, dose, distribute or mix fluids. They are found in many application areas.

Solenoids offer fast and safe switching, high reliability, long service life, good medium compatibility of the materials used, low control power and compact design.

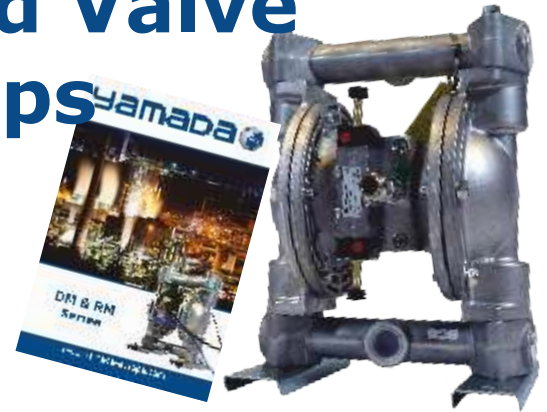

Launch XDP Serie

The Xtreme Duty Pro™ XDP is designed for use in process type applications including filter press, high pressure, extended deadheading, long runs of discharge pipe and where air consumption is critical.

For pricing, please contact your Regional Sales Manager.

Launch NDP-32BAN

Have you ever wanted to replace your old pump for a Yamada, but faced re-piping issues? With the new **NDP-32 Serie** Pump from Yamada, your problems are solved. This new 1-1/2" inlet X 1-1/4" outlet matches up dimensionally with that old competing brands design. Now your conversion to Yamada is just much easier.
