YAMADA STUDY CASE

**YAMADA
STUDY CASE**

June 2023

Africa

Yamada pump model:
KPL-24 (851835 and 880639)

Industry / Branch:
(Open) Mining

Application / Process / Fluid:
Ground moving equipment

Country:
Several African countries

Description:

Yamada Lubrication in South Africa installs Yamada grease lubricators KPL-24 on earth moving machines used in open mining, they even locally adjust the standard 15 kg grease bucket to a 30 kg bucket to reduce downtime. These photos show nicely how Yamada KPL-24 lubricators can be used with earth moving equipment.

If your client uses excavators, bulldozers, dump trucks, backhoe loaders – there is a potential for KPL-24 lubricators. All these machines must be lubricated, and our Yamada KPL-24 can be a perfect solution for this.

This customer also uses the KPL-24 lubricators as mobile greasing systems.

Why use Yamada KPL-24?

Electric-powered, our 24-Volt DC KPL-24 is a safer, more effective alternative to hydraulic or pneumatic lubricators. The KPL-24 greases heavy-duty equipment fast and efficiently without tapping into hydraulic or pneumatic lines.
