

TECHNICAL  
UPDATE  
January 2024

### Drum kits

## Drum kits

Yamada Europe is introducing new drum kits for our existing pumps. These kits allow you to rebuild the standard pump into a drum pump.

DP-10  
drum

Convert standard pump to a drum pump with a drum kit

NDP-15  
drum

The drum kits will be introduced because Yamada has stopped producing the drum version of the following pumps: NDP-15, NDP-P20, DP-10 in SUS. Also, the Global series are not available in drum version. Specially for these pumps, these drum kits are created.

When you order a standard pump + our new drum kit, it will allow you to have a drum pump as result. The rebuilding process is very simple, clear, good explained and easy. All the drum kits contain everything you need for the process.
